

Retail Solutions from Cunninghams

Bringing book retailers into the 21st century, Cunninghams with Triquestra and Toshiba reveal the perfect POS solution. Australia's biggest book retailer Angus & Robertson already enjoys the improved service levels and revenue it can provide. Read on below about the exclusive benefits of the Infinity POS system.

Neilson Online Book Search

Search for any book ever written on the Neilson book database. Create and update book information and view cover pictures, release dates, page counts, etc. Available on the Back Office Station (BOS) and Point-of Sale.

Reordering Worksheet

Make informed stock reordering decisions based on customers' sales history, demands and outstanding orders. Benefit from the ability to merge orders and send them to suppliers when required.

Stock Receipting

Scan in all stock received and reconcile subsequent suppliers invoices correctly and automatically, even in varying currencies.

Operational Integrity

Robustness

Toshiba POS hardware is our solution's trusted foundation, its advanced, high-speed and stylish units are simply ideally suited.

IERP Integration

A genuine relational database, Infinity provides a powerful and flexible platform that integrates with all major ERP brands.

Complete Product Category Management

Suitable for all retail formats, hold all stock lines at all stores, some lines at some stores, or individual lines at individual stores.

Business Visibility

Sales & Revenue Data

Patented Linker™ technology allows marketing departments and category managers to view genuine real-time sales and stock information, evaluating the effects of sales promotions minute-by-minute, at any location.

Reports & Evaluation

Flexible reporting enables retailers to 'slice and dice' data to evaluate performance. The system is also a genuine RDBMS, and a preferred report writer can be used.

Stock Inventory

Market Development

Gain significant marketing firepower with Infinity

Sales Promotions

Benefit from highly targeted campaigns, a promotional pricing tool enables sales promotions to be managed effectively.

Customer Relationship Management

Virtual Till

Integrate existing e-commerce websites with Infinity using this fully managed service. Synchronise online sales, catalogue, customer details, stock levels and pricing. Everything is hosted, managed and monitored for reliability and security.
