

# Omal Compact Counter Cache Cassette

Omal Compact Counter Cache Cassette -  
the secure solution to transport notes,  
cheques, vouchers and credit card slips.

# Omni Compact Counter Cache Cassette

The Omni Compact Counter Cache Cassette has all the advantages of the popular existing cassette and more. Developed over a period of two years and building upon 15 years of on the job experience, the Compact Counter Cache Cassette offers a greatly improved 'tried and tested' secure solution of transporting notes, cheques, vouchers and credit card slips from the check-out to the point of reconciliation. Mounted at Point of Sale, merely transfer the media (notes, vouchers) from your till drawer into the cassette. The horizontal method of pushing the media into the cassette eliminates jams and presents the contents flat and ready for counting. The Omni Compact Counter Cache has all the benefits of being able to perform your cash lifts at a time that is most convenient to you, when staff are less at risk, customer queues are at their smallest and you can ensure the least amount of disruption for everyone. Rest assured the Omni Compact Counter Cache Cassette will pay for itself in no time by reducing both collection and reconciliation time.

- Deposit 1-20 currency sized pieces of paper to a capacity of 350
- Temporary storage of individual till contents at Point of Sale or in your overnight safe
- Patented horizontal pusher action ensures smoother operation and creates a neatly stacked and presented pile for swift counting
- Accepts all known currency denominations

The cassette must be inserted into the Compact Counter Cache unit prior to the deposit of your cash, cheques, vouchers and/or credit card slips. The uniquely designed receptacle with a capacity of 350 currency sized pieces of paper provides temporary and safe storage at Point of Sale during opening hours. After closing time individual till contents can be stored in the cassettes in the overnight safe of your cash office. The patented pusher action and horizontal storage mechanism maintains a smooth and efficient operating procedure. The unit will receive batch sizes of between 1-20 items in one go. These currency sized pieces of paper are then horizontally compressed in the internal cassette, ensuring the maximum capacity can be stored during trading shifts. On opening the cassette, the internal spring mechanism pushes the contents out in an orderly fashion, creating a neat and carefully stacked pile ready for swift transfer to a Friction Note Counter or Omni Cash Counter for counting. Completely Euro ready, the cassette dimensions will accept all known currency denominations. Security seals can be added for the provision of an unbroken audit trail.

- Robust metal unit mounted out of sight at Point of Sale
- 'Anti fish' deposit drawer with locking mechanism
- Tamper evident security seals

Security has been key in the design of the Compact Counter Cache model. A number of safety devices have been built in to protect both your hard-earned cash and your staff. The robust metal Compact Counter Cache unit is set further back under the adopted mounting surface. This not only means its profile is less prominent, obscuring it from view and making it less likely to be seen by potential thieves, but also reduces the opportunity to force removal of the complete unit by minimising leverage. The deposit drawer can only be opened far enough to deposit between 1-20 items and then a locking mechanism prevents any further outward movement. Once the items are deposited and the drawer has been closed, it cannot be re-opened until the contents have been plunged into the main unit. The whole concept of the system makes the unit less prone to manipulation. Cassettes can only be removed using a security keyplate, which in turn seals the contents. Security seals provide a traceable audit trail. All these elements reduce the temptation of theft, time spent accounting for discrepancies and ultimately drive down your costs.

- Various mounting options
- Simplified repair and unit replacement
- Seamless exchange of internal receptacle

The Compact Counter Cache unit is easily mounted at Point of Sale and various mounting options optimise space limitations. If changing over from the previous model, mounting channel holes can be adapted and disruption minimised. Repairs or replacements can be carried out in seconds, negating the need for long periods of 'down time' and ensuring a continuation of trading. No need for expensive after hours call-outs affording a swift continuation of what is often now a 24 hour trading cycle. Another major advantage of this would be the seamless exchange of the internal receptacle should a retailer decide to significantly change their operating procedure and swap from using the cassette version to the 'pouch' version or vice versa (E.g. in the transition to 'Prime Count' - the outsourcing of cash transportation and reconciliation.)

**Vision** - Our goal is that Omni equipment will enable cash handling at the point of sale as simply, swiftly and securely as swiping a card.

**Mission** - Our mission is to create time and profit by offering the tools you need to minimize the risks and hassles of cash handling.

**Values - Simplicity** - Each of our designs is driven by the belief that all our equipment should be simple to use. **Speed** - All our products are designed to speed up counting, moving & crediting of cash, to increase your profit and free up your time. **Security** - We create products to help free you from fraud, error, theft and worry.

**Quality Policy** - It is the policy of Volumatic to strive to be the best at everything we do. Whenever a customer makes a request we aim to handle it efficiently and effectively whilst also trying to *improve* our service every time. We also strive to *improve* processes, products and services in general by a combination of employee motivation, pride and empowerment combined with management commitment and planning.

**Training** Our field trainers can assist customers during process trials and train new/existing users of Counter Cache with the simple objective 'get the best out of your Counter Cache!'

**Warranty** Omni Counter Cache are supplied with a 2 year warranty as standard.

**MultiCurrency** Compact cassette dimensions will accept all known currency denominations.
